VM Drilling is a well-established drilling services provider with more than 60 full-time employees and a solid management team that has been providing innovative, professional drilling solutions to the Australian mining industry since 2004. Our operational base is located in Kalgoorlie-Boulder, Western Australia where we strive to contribute to the local community and employ staff who live in the city.

VM Drilling offers drilling services to clients throughout Australia, and with an internal transport division we are able to cost-effectively mobilise our equipment and freight to virtually any location. With an internal engineering company, ready supply of parts and consumables is no issue.

VM Drilling's difference is in our uniquely versatile approach, utilising fit-for-purpose equipment to assist our customers to achieve their goals.

The right specialty service, when and where it's needed the most.

## MISSION STATEMENT

At VM Drilling we strive to be an industry leading drilling service provider, committed to building a sustainable company, focusing on the needs of our customer and the care of our employees.

### VISION STATEMENTS

**Safety** – Operate safely or not at all, no task is worth doing if it cannot be done safely.

**Innovation** – Solutions driven, focusing on the needs of our customer and the safety of our employees.

**Integrity** – We pride our company on high moral, ethical and business values and principles. Staying true to ourselves while upholding our client's values, expectations and deadlines as a priority.

**Excellence** – In our pursuit of personal excellence, we ask everyone to focus on their awareness, attitude, actions, abilities, adaptability, accountability and achievements. So together we grow.

## CAPABILITIES

- Track based grade control drilling to 54 meters
- Full pit coverage with articulated mast and boom setup
- First pass exploration/air core and slimline RC
- Internal transport company to reduce mobilisation costs
- Internal engineering company for innovative solutions

## TRAINING

VM Drilling is committed to providing a skilled workforce, with a comprehensive internal verification of competency training program.

VM has partnered with local RTO's to enroll all operational staff in Nationally Accredited Drilling Certification traineeships.

This not only helps the company fulfil its employee development program goals, but ultimately offer all clients a superior service.

## TESTIMONIALS

*I have utilised and relied upon VM Drilling since their establishment in 2004, having drilled thousands of safe, efficient metres in that time, primarily in the West Australian gold sector. VM's eye for continual improvement means sampling quality and work efficiency is second to none and well supported. Their fleet is well maintained which means every job is done with minimal downtime and maximum safety. This equates to cost savings for their clients. When I need an RC job done right the first time, VM is my first choice*

**Ben Pollard (DIRECTOR – CADRE GEOLOGY AND MINING PTY LTD)**

*I have used VM Drilling since 2004 and have found them to be professional, supportive with flexible rig scheduling, have an ability to deliver on target metres and be cost effective. They deliver this with a sound approach to safety. Their ROC L8 rigs provide the in-pit mobility and versatility required to drill the trickiest of holes. I highly recommend using VM Drilling for any grade control programme.*

**Darryl Mapleson (DIRECTOR – BMGS)**

*Over the past 15 years I have worked on a number of projects where VM drilling have completed safe and efficient GC programmes. I have found VM to be an open and transparent drilling company who delivers quality and supportive services on our projects. I would have no problems in recommending VM drilling to undertake your next drilling programme*

**Rod Owen (DIRECTOR – GOLDFIELDS TECHNICAL SERVICES)**

## GIVING BACK INITIATIVE

The giving back initiative is a pledge VM Drilling has made to give back to a select few worthy causes.

In 2019, VM Drilling partnered with Something Pink for Breast Cancer to become their major sponsor. We painted a rig pink and donate a percentage of the monthly revenue the rig generates to the foundation who is the major fundraiser for the Breast Cancer Research Centre (BCRC) WA.

In 2021, we partnered with Mates 4 Mates Goldfields-Esperance and the Blue Tree Project, painting a rig blue and also donating a percentage of monthly revenue the rig produces to the charities to help them in their quest to raise awareness of depression and suicide prevention and spread the work that it's OK not to be OK.
